Searching for Clues: From Facebook and Forensic Triage to the Blink of an Eye: New Investigation Techniques

Gary Dunn brings the expertise gained from 27 years as a Special Agent with the FBI, including serving as Lead Investigator and Undercover Agent in the Greylord, Incubator, Quietus and murder for hire investigations, to the challenges of private investigation. He was the defense investigator in the last trial of David Camm (appeal pending), and is a frequent lecturer for Indiana University, Ivy Tech's Criminal Justice Department (former Chair) and numerous law enforcement, probation and parole seminars.

Lt. Charles Cohen has been a forerunner in law enforcement patrolling the online domain. He has lectured nationally on the utility of forensic triage in solving both online and offline crimes. He has served on the faculty for the FBI Academy. He is the author of "Growing Challenge of Computer Forensics," an article in The Police Chief, the Professional Voice of Law Enforcement, Vol. 74, no. 3, March, 2007.

Michele Stuart was rated the most effective speaker at the 2008 National Defender Investigator Association meeting. Through hands on demonstrations and case examples, Michele will show us that everyone leaves a traceable trail in the online world. Personal and business data on a witness can be culled from social networking sites, email tracing and blogging.
